

An American company operating a worldwide online payments system that supports online money transfers and serves as an electronic alternative to traditional paper methods like checks and money orders.

Business Problems

The client operates in Financial domain. They have min 15-20 new company codes created per month. To setup a new company code, there are multiple team members involved and so the manual efforts involved was high.

SOAIS Solution & Benefits

SOAIS team worked with the Business owner & Users to automate this full activity. To create one Company code, it used to take manual effort of about 6-8 hrs per resource. With the help of automation scripts, creating a new company code could be completed in just 21 mins.

This automation saved about 120 hrs for creating 15 company codes.
