

Deutsche Telekom is a German telecommunications company headquartered in Bonn and by revenue the largest telecommunications provider in Europe

Business Problems

Client had huge regression test suit to validate their SAP systems, comprising of financial modules like AA, AP, AR, CO, GL, PROC, PSL which they called them as streams. They wanted to automate them before one of their major release so that they could use the automated processes to validate their subsequent deployments.

SOAIS Solution & Benefits

SOAIS team provided the roadmap for automation of test cases using Worksoft certify. We automated 600+ processes within 3 months of time. Though there were network connectivity issues due to highly secured network, team could automate required number of test cases in stipulated time.

These test scripts saved around 1000+ man hours in each testing lifecycle on validating the functionalities.
