Simplifying Complex Automation with SOAIS Faster Testing and Reliable SAP Web Integration

Introduction

A global consumer goods company had invested in Worksoft Certify for its test automation needs. They faced significant challenges due to a lack of expertise in using the tool effectively. They struggled with handling complex Web and Silverlight objects, managing dynamic SAP tables, and creating logic for automated processes. Partnering with SOAIS, the company gained the support and expertise needed to overcome these challenges and fully leverage its Certify investment.

Business Challenges

Lack of Expertise in Worksoft Certify
The customer's team lacked the skills to fully leverage their Worksoft Certify investments.

Challenges with Complex Web and Silverlight Objects
Handling complex Web and Silverlight objects proved difficult during automation.

Difficulty Managing Dynamic SAP Tables
Dynamic SAP tables complicated the creation of accurate test scripts.

Complicated Logic for Process Automation
Creating logic for automation was a key challenge.

SOAIS Solution

SOAIS worked closely with the company to provide the expertise and support needed to tackle these challenges. Through hands-on mentoring and guidance, SOAIS helped the company optimize their use of Worksoft Certify.

Expert Guidance and Support
The SOAIS team assisted in handling complex Web and Silverlight objects, enabling accurate test automation.

Efficient Handling of Dynamic SAP Tables
The SOAIS team developed strategies to manage dynamic SAP tables, boosting test accuracy.

Customizing Logic for Automation
SOAIS helped create custom automation logic tailored to the company's unique testing needs.

Optimized Use of Worksoft Certify
The customer maximized its automation ROI by leveraging SOAIS expertise.

Key benefits

- Significantly Increased ROI
- Increased Testing Efficiency
- Expert-Led Solution
- Improved Automation Coverage
- Enhanced Business Value

Conclusion

Through SOAIS collaboration, the company overcame challenges that had limited their use of Worksoft Certify. With expert support and tailored solutions, they now enjoy the full benefits of test automation—optimixed test processes, reducing testing time, and improved efficiency. This case highlights the power of expert-driven solutions in maximizing enterprise tools and driving successful outcomes in test automation.
