Unlocking Certify's Potential with SOAIS Broader Coverage and Scalable Regression with Best Practices

Introduction

A leading manufacturer of building products had invested in Worksoft Certify to automate their testing. But they struggled to fully utilize the tool due to a lack of skills and experience. They were conducting testing in silos for their SAP ECC application. They were not following best practices, which limited the effectiveness of their test automation efforts. Partnering with SOAIS, they were able to unlock the full potential of Certify, automate critical business processes, and achieve a return on their investment.

Business Challenges

Limited Use of Worksoft Certify
Despite owning Worksoft Certify, the tool wasn't used effectively due to limited in-house expertise.

Testing in Silos for SAP ECC
Testing was restricted to isolated SAP ECC processes, missing chances for full end-to-end automation.

Lack of Best Practices
Not incorporating test automation best practices led to inefficiencies and inconsistent results.

Underutilization of Automation Potential
Without a strong test strategy, the company couldn't capitalize on its Certify investment.

SOAIS Solution

SOAIS worked closely with the customer to fully leverage Worksoft Certify's capabilities, automate key business scenarios, and develop a structured, end-to-end testing approach.

End-to-End Automation of Business Scenarios
SOAIS automated key business processes with comprehensive end-to-end scripts, ensuring high test coverage.

Adoption of Best Practices
SOAIS guided the company in applying automation best practices, boosting efficiency and test reliability.

Creation of Regression Suite
A strong regression suite was built to validate the system before SAP upgrades and prevent new issues.

Maximizing ROI on Automation Investment
Optimizing Worksoft Certify usage helped reduce manual testing and improve ROI on automation efforts.

Key benefits

- Comprehensive Test Coverage
- Increased Testing Efficiency
- Improved System Stability
- Higher Return On Investment
- Improved Automation Expertise

Conclusion

Through its partnership with SOAIS, the company was able to fully harness the power of Worksoft Certify. Implementing best practices, automating key business scenarios, and improving their overall testing process became the norm. This transformation allowed the company to significantly enhance testing efficiency, reduce costs, and achieve a strong ROI on their test automation investments.
