SOAIS
Putting Customers First

Europe's Largest Aviation Company based in Germany takes it's HR to Cloud with Intelligent Automation.

Business Problems

With privacy and restrictions on the personal data found in enterprise HR applications, Operations teams cannot simply access the data. Moreover, the data access for testing purposes is very restrictive and do not have the possibility to simply copy production environment to a test environment and start testing.

SOAIS Solution & Benefits

SOAIS team automated testing for Core HR and Payroll which allowed customer IT teams to run their routines to get the results and reporting necessary to know if their business rules and workflows are still up and running and if the data is still correct, without granting access to the sensitive data itself.

This helped customer to establish automation and modernize HR experience for over 130,000 employees.
